

Planning:

As the project increases in size, there needs to be more organization of tasks.

Organization can help make progress go more smoothly. The goal of planning is to keep track of what has been completed and what hasn't and still needs to be done. That way the holes that still need to be filled can be more easily seen as well as the current status of the website.

Current Tasks:

High Priority Tasks

- A navigation bar is needed for the website navigation. This will allow users to go to any page by simply clicking on one of the links in the navigation bar.
- Improving the existing webpages.
 - Use CSS to add style to current webpages: index.html, quiz.html and environmentalJustice.html.
 - index.html should be worked on first.
 - Focus on 1 page to build up its quality.

Medium Priority Tasks

- Prepare presentation of current website project.
 - 5-10 minute presentations are fine.
 - You can give a demonstration of your website.
 - A powerpoint can be used to organize the website.

Low Priority Tasks

- Complete a rough draft of the project manual.

Completed Tasks:

{To be recorded at a later time.}
